

# Greeley Estates, Too Much CSI

Best night of my life  
Blood and dirt remind me that I'm alive  
I failed to see this coming  
When all the signs pointed at you

I should have known it was you  
I should have seen in your eyes

It's twisted how you set me up  
I never thought that you were who you are  
To think I trusted in you  
When this was always part of your plan

I should have known it was you  
I should have seen in your eyes  
Tie me up behind this truck so that I won't forget you  
Keep dragging me just like you are  
You know I won't forget you

I'm holding on for my revenge  
Cause if I die tonight then you get away  
The pain is not the issue  
Just think of what I'll do to you

I should have known it was you  
I should have seen in your eyes  
Tie me up behind this truck so that I won't forget you  
Keep dragging me just like you are  
You know I won't forget your face

Forget your face, your face.  
Forget your face.

I can taste my sweet revenge  
You know that we'll meet again  
I can taste my sweet revenge  
You know that we'll meet again

I failed to see this coming  
When all the signs pointed at you

Tie me up behind this truck so that I won't forget you  
Keep dragging me just like you are  
You know I won't forget your face

Forget your face, your face.  
Forget your face, your face.
