

# Green Apple Quick Step, Can't Believe

Like all my friends  
Who's biting on my nails  
I just wish you'd pound em in  
Do you really want to be my best friend  
You let me know  
Cause I won't let you win

I'm mad at you  
So flushed with the anger  
Another tongue inside your face  
The face of the devil  
And here we go alone  
Do you have your army men?

You let me know 'cause I won't let you win  
I can't believe what she is doing to me  
That's not right  
Can't believe what she is doing to me  
That's not right

All my rings are stuck on my fingers  
Swollen tight with the perception in your room  
You're so vain you probably think this song is about you  
You let me know 'cause I won't let you go  
Can't believe what she is doing to me  
That's not right

Sting me...do it again  
Slap me as hard as you can now

Can't believe what she is doing to me  
That's not right
