

Green Autumn, Reason

Is there any reason why
I should live before i die
Don't know what still has it's meaning
when you're not here with me

I know i'm sinking in
just managed to breathe you in
over boundries in my head

When hey
all your love is here with me
I could not be your reason
and what will be
tomorrow you'll be waiting out for me
another time in space

I'm living on a cloud and watch you fall apart
it's like breathing under water
and i can't close my eyes

When hey
all your love is here with me
I could not be your reason
and what will be
tomorrow you'll be waiting out this time
inside

When hey
all your love is here with me
i could not be your reason
and what will be
tomorrow you'll be waiting
inside
inside
inside over me
over me
