

Grinspoon, Save Me

"We also like to blow holes in the heads of rednecks" (sample)

You can't try and sink your thoughts into my brain

Contradict, you've always been too lame

Guilt has always found you hiding away

Wallow in your pity

You make sick

I make you

Every time I see you I break you

You make sick

I make you

Every time I see you I break you

You make sick

I make you

Every time I see you I break you

You make sick

I make you

Every time I see you I break you

Train your mind to believe

All that you say

Stab yourself so he will turn in today

Ben and frank, bliss isn't what you prayed

Don't you ever say what matters

You make sick

I make you

Every time I see you I break you

You make sick

I make you

Every time I see you I break you

You make sick

I make you

Every time I see you I break you

You make sick

I make you

Every time I see you I break you

Break you down,

Yeah I'm breaking you down

You're broken down

Crave me!

You can't try and sink your thoughts into my brain

Contradict, you've always been too lame

Guilt has always found you hiding away

Wallow in your pity

You make sick

I make you

Every time I see you I break you

You make sick

I make you

Every time I see you I break you

You make sick

I make you

Every time I see you I break you

You make sick

I make you

Every time I see you I break you

You make sick

I make you

Every time I see you I break you
