

# Guardian, Like The Sun

See my life in a movie show  
A hiding place I used to know  
Played an actor's role that stole from my true part  
Take me down the road a ways  
And I'm thankful for these better days  
I never dreamed you'd love me like you do  
My it seems its been a long and lonely winter  
I hear your voice in the morning  
When I'm sad  
I feel you smile and whisper to me  
Every little thing will be alright  
Like the sun  
Comes shinin' through my window  
Breaks the darkness in the early morning light  
Sing a song of sixpence  
And a pocket full of rye  
In the fall it seems the blackbirds fly away  
And there's times I'm feelin' not so strong  
Can't face another highway song  
Then I remember  
That you're never too far away  
As I walk down this lonely stretch of highway  
I hear your voice callin' me back home  
When I'm sad  
I feel you smile and whisper to me  
Every little thing will be alright  
Like the sun  
Comes shinin' through my window  
Breaks the darkness in the early morning light  
Long ago and so far away  
Lives a dream, a dream I used to know  
Like the sun in the morning  
Shinin' on my face, you bring me home again  
Home again to you  
I'm so glad  
To feel you smile  
And whisper to me  
Every little thing will be alright  
Like the sun  
Shinin' through my window
