

# Guided By Voices, Burns Carpenter, Man Of Science

Burns Carpenter, Man of Science  
discovers a new rich compound  
a liquid form of love  
a brain in psychic peril  
This kind of love  
will destroy the ozone  
Tossed sharply in production  
but unique opportunity presents itself  
then this is the new school  
the first day is always anxious

the first day is always  
This kind of love  
will destroy the ozone  
Taken to the test  
but regrettably not sold  
for ultimately it must fail  
untimely and perhaps not too bold  
This kind of love  
will destroy the ozone
