

Guided By Voices, In Walked The Moon

Everything we said we said in fun
I cannot believe she'd come undone
She was the happiest girl I'd ever seen

Said she didn't need left on her own
followed me to some place all alone
She was the scrappiest girl I'd ever seen

So then in walked the moon
And I knew that soon
I would have to tell the truth
Talked so fast she stopped me
And then in came the song
That the night sings when it's wrong
We'd like to stick around
Needless to say she stopped me

Summer came, just the same
We became tired and lazy
Now it's gone though I tried
She became wild and crazy
I know why
I know why
If you look in the past
She was into her own thing
Turn around in my arms
Now she's gone and I'm longing
I know why
I know why

Everything we said we said in fun
I cannot believe she'd come undone
She was the happiest girl that I'd ever seen

So then in walked the moon
And I knew that soon
I would have to tell the truth
Talked so fast she stopped me
And then in came the song
That the night sings when it's wrong
Would have liked to stick around
Needless to say she stopped me

There is this place that I know
Far from this unforgiving glow
There is this place that I know
Far from this unforgiving glow
There is this place that I know
Far from this unforgiving glow
There is this place that I know
Far from this unforgiving glow
There is this place that I know
Far from this unforgiving glow
