

# Guided By Voices, Never Forget Where You Get

Never Forget Where You Get Them  
We remind you  
Always behind you  
Watching closely the lovers  
Never repeat where you found them  
Blind sighted you  
Ignited you  
To do a new world image make-over  
Never forget where you got it  
They have spared you  
But they don't care for you  
Close-ups mingle, all wrinkled

Never forget where you get them  
'Cus if you forget it  
You will regret it  
And don't forget who said it, now

So never forget where you get them  
When there are oceans heavy on your mind  
Round up your things and see what you find  
Let go the coats and leave them behind
