

# Gun, Don't Say It's Over

Ive been searching all my life  
Ive waited for so long  
When it came down to you and me  
Now I find that I was wrong

I see the changes in your eyes  
Wheres the magic in your smile  
Theres no way Im gonna let it die  
You know Ill crawl for a thousand miles yeh

If we dont know by now, we could be losing everything  
Please dont say its over  
And if our love should fall from grace  
Please dont say its over

We cant see eye to eye  
Like the way we used to do  
When its all been said and done  
Still a candle burns for you

Forget about the things we said  
It dont matter right or wrong  
Sometimes well you just dont know  
What youve got until its gone yeh

I would give it all, I would do most anything  
Please dont say its over  
If we dont know by now, then its too late  
Just dont say its over  
Dont say its over

All I want is to be near you  
All I am is what you see  
All I Know tell me can you hear me  
Youre all I need yeh, yeh, yeh

If we dont know by now, we could be losing everything  
Please dont say its over  
And if our love should fall from grace  
Just dont say its over

I would give it all, I would do must anything  
Just dont say its over  
If we dont know by now, then its too late  
Just dont say its over

Dont say its over
