

Gun, I Will Be Waiting

Woman it's a wild life slow down
Heaven is just a kiss away, bright lights
Shining from above, cover me with love
Angel, angel, she's falling from above

I need you like I need a drug
I want you to be there

I will be waiting
Come out of the shadows
I will be waiting
This is your chance
No regrets this time
Leave the past behind
Take a walk with me

If I lose faith, will you give me shelter?
Cover me with love, shining from above
There's a place I know
And it's a lonely road

I will be waiting
Come out of the shadows
I will be waiting
This is your chance
No regrets this time
Leave the past behind
Take a walk with me

Don't be cruel, don't be blind
Don't be fooled, left behind
Precious life, torn in two
Say the word it's down to you
See the light (Don't be cruel, don't be blind)
See the light (Don't be fooled, left behind)
See the light (Precious life, torn in two)
See the light (Say the word it's down to you)

I will be waiting
I will be waiting
I will be waiting
Always be waiting
Can't let you go
It's a lonely road
Can't let you go
Seen it all before
