

# Guttermouth, This Won't Hurt A Bit

i tell you not to drink so much  
my god you never listen  
one more time you come home drunk  
it's me you'll be missin'  
take it back  
take it back

don't make me raise my hand  
don't talk back or you'll get slapped  
if it happens just, happens

one more time  
one more time  
one more time

don't you lay a hand on me  
keep you fuckin' distance  
the cops are gonna get ya  
if you threaten my existence

take it back  
take it back

see now your eye is black  
i told you if you call the cops  
it's teeth that you'll be missin'

one more time  
one more time  
one more time

don't you know it breaks my heart  
though you call it abusen  
one day you'll obey these words  
this method has been proven

take it back  
take it back

it's just a little smack  
to let you know i love you  
but it better not happen one more time  
one more time...
