

# Guttermouth, Where Was I?

well, country's in the red  
soon we'll be dead  
no life, not even a flower  
cause atomic power  
scares the shit out of you  
there's nothing you can do  
undecided men  
bout a war you can't win  
hey, who would want to win the damn thing anyway, right boys?!  
children turn green  
the flowers die  
all the people are gone except i  
the atom bombs have exploded near  
where was i if i wasn't here?  
atomic was one way out  
nuclear was the final bout  
atomic war can destroy our race  
leave the earth in all but waste  
but, where was i  
when the trouble started?  
where was i when the two sides parted?  
where was i if i wasn't here?  
cause the atom bombs have exploded near  
but nothing's happened to me so...
