

Gypsy Kyss, One Way Out

How many times must I tell you
Tell you to leave me alone
I'm not gonna fight
Huh, I couldn't take you alone
And I know you know how to get me down and break me
You could leave me face down in the dirt
But, you can't take away my spirit
And I won't forget about the hurt
There's only one way out
I can't find my way around
There's only one way out
That's through you
It's an eerie confrontation : Me against myself
And I kinda feel strange
We are one : The same man
Is one of us ever going to change
I live day in, day out by your rules
You live and pray on the channels of my mind
I wrack my brains to get rid of you
The spirit that poisons me inside
Release the night, release the night
You son of a bitch what must I do
I'm in a corner hidden tight
And the only way out is through you
