

Gyroscope, Driving For The Storm

I mean you so much pain
forever again
Why for I can't explain
We'll drive for the storm again
Holding onto the scent
Everything gets in the way in the way now
everything gets in the way
Everything gets in the way in the way now
everything gets in the way
I'll drive you sing the refrain
forever again
Our hi-beams cut the rain
Let's drive for the storm again
Smell distress through the vents
Everything gets in the way in the way now
everything gets in the way
Everything gets in the way in the way now
everything gets in the way
Everything gets in the way in the way now
everything gets in the way
Everything gets in the way in the way now
everything gets in the way
Everything gets in the way in the way
everything everything
Everything gets in the way
way way way
