

H.I.M., Venus (In Our Blood)

Her Heaven's a lie to those who threw away the key
Her God is alive and well when the heart of her
And you can't bend the river of her dreams
Or understand the divine words she speaks

Venus denies your severing tides above dark waters
You can't quench her thirst with the fear hiding away from the day
Venus denies you in your dark waters
The moon kissed the sun and now we hold her in our blood

Her savior was never on a cross pierced with nails
Thirty pieces of silver never retraced her mistake
She'll always be free from the arms of your sins
That made you weak as your world started crumbling

Venus denies your severing tides above dark waters
You can't quench her thirst with the fear hiding away from the day
Venus denies you in your dark waters
The moon kissed the sun and now we hold her in our blood

(She's in our blood)
Venus denies your severing tides above dark waters
You can't quench her thirst with the fear hiding away from the day
The Venus denies you in your dark waters
The moon kissed the sun and now we hold her in our blood
In our blood
In our blood
In our blood
(She's in our blood)
