

Hailee Steinfeld, Coast (ft. Anderson .Paak)

You the wave upon my ocean
pounding rhythm and motion
its full moon kinda night yeah
I don't wanna go home yet

You can question my devotion
Wear my heart on my shoulder
just relax and let the riptide pull you close

ahh
Baby all i want to do is coast
with you
energy the body flows
ahhh
baby all i want to do is coast
with you
Frequency of all we know

Feelin like I caught a wave with ya
I been dealin with a lot of changes
And all the people that I like to hang with
They all been sayin that I ain't the same
Listen, I been chillin with you for a couple days
If you ain't afraid me and you should rage in the sun rays
Come on out the cage don't wanna tame
Live it your way
Body go for days
Got me in a daze
Parties in LA feel like holidays
Hit the PCH
And we on our way to a place I was born and raised
You live on the screen and the stage
I wanna fit in between your legs
Let's pick a day
Everything can wait
Words can't relay but it's giving... fate

Baby all i want to do is coast
with you
energy the body flows
ahhh
baby all i want to do is coast
with you
Frequency of all we know

nothing feels as real when we're connected
so relax and let the riptide pull you close
ahhh
baby all i want to do is coast
with you
Frequency of all we know

the stars come down
ya drown them out
I'm sinking deeper into you
i breath you in
i breathe you out
im sinking deeper into

ahh
Baby all i want to do is coast
with you
energy the body flows
ahhh

baby all i want to do is coast
with you
Frequency of all we know

nothing feels as real when we're connected
so relax and let the riptide pull you close
ahhh
baby all i want to do is coast
with you
Frequency of all we know
