

Halifax, Shootout (You'll Never Come Back)

Red lights are flashing on the road
The sounds of calls
Will be the last sound that you'll hear
The one sound your remember for the
Rest of your lifetime cuts you down by the size
60 seconds later we'll be talking through
6 feet of loneliness

This is our last goodbye
Until my dream i wonder why
It only took one shot straight into his chest
But it went out the other end
And in my heart and straight through yours

We said we'd live on forever today must be forever cause my friends out cold
My best friends out cold
Lets live on second chances
Lets live on second chances
Dont regret not wishing for more

This is our last goodbye
Until my dream i wonder why
It only took one shot straight into his chest
But it went out the other end
And in my heart and straight through yours
And it hurts so bad its killing me inside
Inside

Where we carved our names
We'll live forever
We'll die together
Hold your head up in shame
Its okay to try
Dont be afraid to cry
