

Halou, Firefly

In the darkest corner of my heart
Is a tiny firefly
Across the years, across the yard
Struggling, he's still alive

Long lost sisters, take me back.
We'll catch all the fireflies
Drop your needle, drop your book
We'll run like banshees through the night

With light comes heat
Into your heart I creak
Into your heart

My love is all around you
I hope you feel
