

Halsey, So Good

[Verse 1]

Lookin' right, lookin' like
All the stars are fated
I remember the night
I was so frustrated
I touch your hand for the first time
I see it on your face, then
Another lifetime's flashin' by

[Pre-Chorus]

I'm here
Standin' in the same dress
You're in your apartment
I'm already gone

[Chorus]

When you left, I bet you held her body closer
And I was hopin' you would tell her it was over
You're all I think about and everywhere I look
I know it's bad, but we could be so good

[Verse 2]

Couple years flashin' by
And I'm doin' okay
In the back of my mind
All I hear is your name
I bet you're happy and that's fine
But I regret just one thing
I never got to change your mind

[Pre-Chorus]

I'm here
Standin' in the same dress
You're in your apartment
I'm already gone
Talkin'
Wildly out of context
I wish things were different
But I'll never know

[Chorus]

When you left, I bet you held her body closer
And I was hopin' you would tell her it was over
You're all I think about and everywhere I look
I know it's bad, but we could be so good

[Bridge]

Maria calls me and she says she's gettin' married
She asked me if there's any extra weight I carry
And do I think about the one that got away
I know his name, I think about him every day

[Chorus]

When you left, I thought you held her body closer
I never knew that you would tell her it was over
'Cause I'm all you think about and everywhere you look
I know it's bad, but we could be so good
