

# Hammerfall, Hammerfall

Silent screaming,  
You're on your own  
Balancing on a blade between  
Whats right and what is wrong  
Don't lose your faith, don't sit there in silence  
show your strength, let's hail the metal gods, bare your heart

All for one, our burning hearts will live forever  
One for all, together standing strong

Hammerfall, we will prevail  
Hammerfall, let us hail  
Hammerfall, let us hail

We share a dream, the future is ours  
A metal heart is hard to tear apart, heed the call  
A flash of light calls out the providers  
We run this race, but we will never crawl, all hail Hammerfall

All for one, our burning hearts will live forever  
One for all, together standing strong

Hammerfall, we will prevail  
Hammerfall, let us hail  
Hammerfall, let us hail

Just follow your heart, don't listen to the crowd  
The wisdom, the voice is calling from inside  
The time long forgotten will soon come again  
Prepare for the meeting, the gods of metal reign
