

# Hands On Approach, Insignificance

For one small point in time  
Forget everything that ever mattered  
Loneliness is just a trick of mind  
Can you fail to remember?

Far away from dreams of youth  
But closer to live without them  
Once I traded feelings for thoughts  
I'll never find myself again

I always do something else  
Light up a cigarette  
And smoke...the joy it brings  
Insignificance...it's just one thing  
It's everything, it's just one thing

For one little moment in time  
Drop everyone that always cared  
Solitude is satellite of love  
Just for once stand alone  
Can you try to fail alone

Far away from tears of childhood  
Will the punishment fit the crime  
Trying to switch fears for thoughts  
When we live somewhere along the line

I always do something else  
Light up a cigarette  
And smoke...the joy it brings  
Insignificance...it's just one thing  
You can always do something else  
Light up a cigarette  
And smoke...the joy it brings  
Insignificance...it's just one thing  
It's everything, it's just one thing
