Hanson, Go

For all the love we've made Just one thing stays the same The lamp gets dusty The pipes get rusty But I don't wanna wash my hands clean

Well you say you love me too Then why won't you go through With the nightly kisses With the hits and the misses Well if you can make it on your own

Then go if you wanna go But stay if you want to know the way Through the mess we've made Or lie in the bed you know or go

I heard your moving van But I didn't take a stand You can't leave with 'em You can't live without 'em I never thought I'd want to let you

Go if you wanna go But stay if you want to know the way Through the mess we've made And lie in the bed you know or go, go! Or go

For all the love we've made Just one thing stays the same The lamp gets dusty The pipes get rusty But I don't wanna wash my hands clean

(Then go if you wanna go) Well you say you love me too (But stay if you wanna know the way) Then why won't you go through (Through the mess we've made) With the nightly kisses (Or lie in the bed you know or go) With the hits and the misses Well if you can make it on your own then go
