## Hanson, Watch Over Me

She wakes and takes her place in line And never bothers asking why The mirror sheds no light at all

The days turn into lesser days Until there's only night The light it wouldn't help She's too far gone

Her time is up, it's five o'clock It never stops

And she says please And she says please And she says please Watch over me

I watch her slowly make her way Down on all the roads she shouldn't take She always ends where she began

The years go by, they're adding up She clicks her heels but she's still stuck She's giving in but won't give up She'll never stop

And she says please And she says please And she says please Watch over me

And she says please And she is On her knees and She begs and she pleads

N-na n-na n-na n-na na na N-na n-na n-na n-na na na N-na n-na n-na n-na na na N-na n-na n-na n-na na na

She counts the time 'til her heart breaks Oh, just waiting for her next mistake

And she says please And she says please And she says please Watch over me

Hey, ho (hey, ho) On her knees and she begs and she pleads

She says please And she says please And she says please Watch over me

She counts the time 'til her heart breaks Oh, just waiting for her next mistake

Don't give up I know you've stopped believing And you're down and you're begging, you're pleading Don't give up cause you're not too far gone Hey, ho, feeling Hey, ho, aw naw naw Hey, ho, not too far gone Oh, I said hey, ho, naw naw Hey, ho, aw naw naw Hey, ho, too far, too far
