

Hard Rain, When The Good Times Come

Where's the luck 'cause we don't get half enough
We never get anywhere but I don't really care
Leave the rest, just give me loving and tenderness
Then everything feels all right, no trouble round here tonight

When the good times come - going to live the life
When the good times come - we're going to shine
When the good times come - going to live the life
When the good times come - we're going to shine

Standing up for what we got plenty of
'Cause we don't need anyone, I know where I belong
Leave the rest, just give me loving and tenderness
Then everything feels all right, no trouble round here tonight

When the good times come - going to live the life
When the good times come - we're going to shine
When the good times come - going to live the life
When the good times come - we're going to shine

You've got to have faith in us, it's going to be really tough
Don't break the trust, keep it in mind
That my love is stronger than any love you find

When the good times come
When the good times come
When the good times come

When the good times come - going to live the life
When the good times come - we're going to shine
When the good times come - going to live the life
When the good times come - we're going to shine
