

Hardline, Face The Night

Remember when our love was strong
Through the toughest times nothing could go wrong
Now I'm gone and the wheels turn on and on
In the hopes of a dream that came from a song
But nothing in this world makes me feel like you do
No matter what life could bring me
Let it bring me right back to you

[Refrain:]

And I won't let you face the night alone
Easy come never easy go
I won't let you face the night alone
I'm coming back

I'll never forget that look in your eyes
Standing on your doorstep I was home for good tonight
As time slipped away the boys they played on
Their dreams turned to gold that came from a song
But nothing in this world means more to me than you
No matter what life could of bought me
It brought me right back to you

[Refrain]
