## Harket Morten, Tell Me What You See

Sleep, my love, sleep Or look up at a sky Returning from its deep See the moon go down Watch the sun come 'round Tell me what you see Sleep, my love, sleep Yeah, look into a world You can no longer reach Time's a one-way track There's no direction back But when you're dreaming Tell me what you see Sleep, my love, sleep Like you slept with me When the world was a dream That we believed It was near It was far It answered to the stars No one's ever been that close to me What did you see Tell me what you see
