

# Hawkwind, Love In Space

Love in space I dream of you  
Love in space I scream to you  
Love in space I cry for you  
Love in space I fly to you

Drifting in our capsules of icy mist  
The ship of dreams sails...

Love in space I dream of you  
Love in space I plead for you  
Love in space I sigh for you  
Love in space I'd die for you

Drifting in our capsules of icy mist  
The ship of dreams sails...

Love in space  
Love in space  
Love in space  
Love in space

Drifting in our capsules of icy mist  
The ship of dreams sails  
On and on...

You say there's life out there in the galaxy  
Our worlds in collision  
You say that's a fallacy  
It's no use sending rockets into space  
Hoping to meet a superior race

Most of our problems are here on Earth  
Our planet's still living  
It's our place of birth

Love in space I dream of you  
Love in space I scream to you  
Love in space I cry for you  
Love in space I fly to you  
Love in space I dream of you  
Love in space I plead for you  
Love in space I sigh for you  
Love in space I'd die for you
