Hawthorne Heights, Angels With Even Filthier So

Just stay the night And well see that things can work out And this will last forever How long can we wait for things to change And this will last forever

Every day, this I say Turn to dust and fade away This will last forever

Every day, this I say Turn to dust and fade away This will last forever

Still waiting for tomorrow Just wait for today To close my eyes

Waiting for tomorrow Just wait for today To say goodbye

She never said she loved me She never said goodbye(X4)

Just stay the night And well see that things can work out And this will last forever How long can we wait for things to change And this will last forever

Every day, this I say Turn to dust and fade away This will last forever

Every day, this I say Turn to dust and fade away This will last forever

Still waiting for tomorrow Just wait for today To close my eyes

Waiting for tomorrow Just wait for today To say goodbye
