

# Hear'Say, Straight From The Heart

Written by: T Hawes / P. Kirtley / T. Ackerman

I know it's always gonna be there  
And that it's carved in stone  
And I know the moon ain't going nowhere  
And it will guide us home  
Baby when I look in your eyes  
It gives me so much joy deep inside  
I could fly to a star  
And look out on forever  
There's a light where you are  
And it shines down from heaven  
And it's straight from the heart  
My love is setting like the sunset  
It is giving and warm  
And your love is nothing less than perfect  
As we follow the storm  
Baby when I look in your eyes  
It gives me so much joy deep inside  
I could fly to a star  
And look out on forever  
There's a light where you are  
And it shines down from heaven  
And it's straight from the heart  
Share with you my love  
Cos I am there with you my love  
And as I stand with you on top of the world  
And I swear to you that my love for you  
Is straight from the heart  
I could fly to a star  
And look out on forever  
There's a light where you are  
And it shines down from heaven  
And it's straight from the heart
