Heart, Christmas Waits

Christmas Waits How long have I been watching from my window Running through my life Watching it all go by Seems like I've always got a destination Running down the time Pushing to the front of th eline I wanna be where the snow is falling Voices of friends like angels calling (Out in the pines - oh beautiful tree) I wanna be there where Christmas waits for me Christmas waits Gather round the fire let the weather rage outside Christmas waits I always will be welcome for the rest of my life Christmas waits
