

Heart, Together Now

Deep inside this city night
There's only you and me
I can only hear your voice
I am all you see
Baby, I love you
Born to be mine
I'll say forever
You say it all the time
Take it like a vow
We're together now
Together now, together now
Together now, together now
In this world so fast, nothing lasts
But I can feel it, we're gonna make it
Together
Now you're winning in big town trade
Lose it once, try to get saved
Talk gets cheap, money gets made
In too deep, time steals away
I call you up, get you on the line
Wanna get back to where we were that time
Wanna get you out, out of this place
Hold you close, just to see your face
Together now, together now
Together now, together now
Together now, together now
Together now, together now
Together now, together now
