

Heartless Bastards, My Maker

When my maker was in denial
I did what I had to do
Then we changed out form of contact
To get through
When my maker was in denial
I did what I had to do
Then we changed out form of contact
To get through

Evolution forces you forward
Changes the way you live your life
Your self revolution keeps you from moving
Always got to put up a fight

You always make everything much harder
Than it has to be
And you are giving me such a big headache
I cannot see
You always make everything much harder
Than it has to be
And you are giving me such a big headache
I cannot see

Evolution forces you forward
Changes the way you live your life
Your self revolution keeps you from moving
Always got to put up a fight

Some day you'll find peace
If you let yourself release
I know I've been there before
All this pain inside you store

Oh you planted, you planted seeds
And you watch them grow, the life it flows
But don't, don't forget to quench your own thirst
Quench your own thirst
