

Hearts Of Black Science, Driverlights

Time is moving faster like the sun
You can feel it in your mind
Getting closer to the burning point

Get yourself right back inside
And let the blood run through your veins
Screaming silence in your head

You're falling blind above my head
The hole in the sky
I thought it was my bleeding lips
You wanted to kiss

You are driving my lightning
The universe it holds you back

Take a dive into the deep black hole
Look for the truth on the other side
Get yourself on a journey through time

Set the pace Baby you're my ace
Through me off your crooked back
Speak to me why don't you kill yourself

You are driving my lightning
The universe it holds you back
You are so sweet my fire
Like a sparkling light you shine
