

Hearts Of Black Science, Serene

Fake it again
Take the world in your hands
Just walk away
Nothing left to say

Shout now my love
It's salvation day
Echoes in our hearts
Once we were in love

Walking drifting away
The beauty lies deep within you

Please don't stay
There is nothing to say
The longer we tried
The worse it became in my mind

Peel off my skin
You're my friend within
Nocturnal life
Feed on the light

Monument in time
Take a walk on the line
On the line, yeah

Walking drifting away
The beauty lies deep within you

Please don't stay
There is nothing to say
The longer we tried
The worse it became in my mind

Making you go put me to rest
No more burden
Weight off my chest
and my mind..
