

# Heather Nova, Always Christmas

Christmas is coming  
Like a road I'm running  
All the lights reminding me there's something more I've got to give

Bells are ringing  
In my head, I'm singing  
Still I can't begin to feel the light that I was meant to live

All of the places that I used to know  
The million faces passing by  
And you and I, we still have far to go

It's always, it's always, it's always Christmas  
When I feel this way  
It's always, it's always, it's always Christmas  
When I feel this way

The night is silent  
How the stars are vibrant  
And I wish the world was peaceful as it seems it is tonight

So hang the mistletoe  
And kiss the one below  
But pray the angels come and bring this world a little light

All of the places that I used to know  
The million faces passing by  
And you and I, we still have far to go

It's always, it's always, it's always Christmas  
When I feel this way  
It's always, it's always, always Christmas  
When I feel this way

O-oh  
Oh

All of the places that I used to know  
The million faces passing by  
And you and I, we still have far to go

It's always, it's always, it's always Christmas  
When I feel this way  
It's always, it's always, always Christmas  
When I feel this way

It's always, it's always, always Christmas  
When I feel this way
