

# Hellogoodbye, Call And Return (Say That You're

You promised me starry night skies  
They just remind me of your shining bright eyes  
Im missing your voice at night time  
This sepa-separation seem-seems a sad crime

B-b-b-but dont dont dont think think think i forgot you you you  
Are are are oh so sweet i i i - i know

If only you were here  
Things would be more magical

If i were there  
Right now would be more radical

Youre so not near  
Im wishing i could place a call

And feel closer to you 000-000

The miles of air and road and land  
That separate me from all my plans  
Were havin' havin' havin' havin' fun  
But something something tells me i miss someone

i hope hope hope you didn't forget me i couldn't  
Forget you the whole time i always knew i knew

If only you were here

Things would be more magical

If i were there  
Right now would be more radical

Youre so not near  
Im wishing i could place a call

And feel closer to you 000-000

Say that youre into me just let me know how it will be  
If you dont know dont say so  
Ill wait till the perfect time think of all the perfect lines  
Ill make sure if i let you know

Weve got movies on our list to see  
Things to do just you and me  
Calls to make from here to there and back  
Weve got fun to have and days to spend  
Stars to see or just pretend  
At least for now just keep things right on track

Say that youre into me just let me know how it will be  
If you dont know dont say so  
Ill wait till the perfect time think of all the perfect lines  
Ill make sure if i let you know
