## Helloween, Still We Go

In the beginning Out of nowhere We had a dream And Now It's Helloween

Speed up to a higher limit Change gear, we're losin' our spirit We won't take your special advice We are close to a metal breakdown Sirens to warn of our meltdown We couldn't see that headline

Now we can see a horizon We're gonna be here to stay If you cannot see our sign You must be blind

Still we go Still we go Still we go On the metal highway Still we go

Warn out, won't die on our knees Shine on, proud as we can be Time has come to stop pleasing you Hey man, Let's get it together Our strength will last forever Push us as far as we can go

Now we can see a horizon We're gonna be here to stay If you cannot see our sign You must be blind

Still we go Still we go Still we go On the metal highway Still we go

## [SOLO]

How many times must a man cross the lines To find his right way

Still we go Still we go Still we go On the metal highway Still we go
