

Henry Gross, That Someone

People say it's a cold, cold world
I say it's a cold, cold world
But it's the best that I have found
People say there's no more love
I say there's plenty of love
And I can feel it all around

Someday that someone'll come through(
And all my dreams gonna come true
I'll have that someone to talk to
I hope that someone is you

People say we're on our own
From the time we're leaving home
They say we're out there all alone
And no-one's ever really true
No matter what they say or do
But I've just got to be with you

Someday that someone'll come through(
And all my dreams gonna come true
I'll have that someone to talk to
I hope that someone is you
