

# Her Space Holiday, Girl Problem

Here is the point  
Where I fall apart  
For the second time in a week  
It could be from  
All those chemicals  
That I pump into me  
You have been gone  
For what feels like  
The longest winter break  
It's just three days  
But it's so much more  
Than I can really take

I've got a girl problem  
I've got a drug problem  
And I don't want to solve them  
They sit right where I want them  
They kill my memory  
They wrote this melody  
And if I take enough  
I won't miss you so much

Here is the part  
Where I apologize  
For thinking that we should  
Take some time off  
Because the loneliness  
Would do us both some good  
I soon found out  
Just how miserable  
I could really be  
All by myself  
In this haunted house  
With my paranoid disease

I've got a girl problem  
I've got a drug problem  
And I don't want to solve them  
They sit right where I want them  
They kill my memory  
They wrote this melody  
And if I take enough  
I won't miss you so much

And I will always think of you as someone that I love
