

Hi Standard, Starry Night

Let me wish shooting star
This is really from my heart
Stop the thoughts spinning in my head
Wish I could just feel
Let me wish shooting star
This is really from my heart
Differences that I feel inside
Wish I could let go

What was it I left behind
And forgot to bring along
What was it shining bright
I saw that night
Let me wish shooting star
This is really from inside my heart
From now on I wanna enjoy my life more
Starry night

Let me wish shooting star
This is really from my heart
What I see here in front of me
Wish I could accept
Let me wish shooting star
This is really from my heart
Everyone who is in my life
Wish I could believe

Where is it that I go
I will have to let it flow
What was it shining bright
I saw that night
Let me wish shooting star
This is really from inside my heart
From now on I wanna like myself more
Starry night

Wish on a starry night
