You sit right there in front of me
But you're so far away
No matter what I ever do
No matter what I say
It bothered me the first 50 times
But now, I got the clue
And me and this here whiskey
Gonna have a drink without you

(Chorus)
Because that whiskey
Can't lie like you do
And that whiskey
To me, its always true
And me and this here whiskey
Gonna have a drink without you

(Lead break)

Gave you everything I had
Myself and my heart
You told me once that you will
But it seems you forgot that part

(Chorus)

I never seen the floor a comin'
The last 2 days are just a blur
I got my ways to make it right
This time its all for her

I find myself outside your window
On the curtain two shadows fall
I think about what's right and wrong
When it's done, I'll be standin' tall
