

# Hollow Bones, Feel

Whatever happened to the word I knew as family? Whatever happened to our sky?  
Now I'm imagining, you've all been thrown away you bring out the worth in me

Don't fall asleep too soon, you'll wake up with the house on fire  
stop painting faces in the sand

I dream a spectacle, it haunts me with the great design  
our dreams are pieces on the floor

We feel...  
like no other love, to feel...  
I want no other love than this...

Teach them how to love and feel...  
like no other, love  
love

Your silence deafens me, I'm paranoid and scared to say just listen to me, don't breathe a word  
They might be giants, in my world this king just plays along trust me to paint myself

We feel...  
like no other love, to feel...  
I want no other love than this...

Teach them how to love and feel...  
like no other

-solo-

We feel...  
like no other love, to feel...  
I want no other love than this...

Teach them how to love and feel...  
like no other, love  
love  
love  
love
