

# Holly Dunn, What Kind Of Love

(Holly Dunn/Chris Waters)

You keep trying to talk me into love  
You sure have a way with words when it comes to us  
But before we get carried away  
Let's get something straight  
What kind of love are we talking about  
What kind of love are we talking about  
When you're telling me all those tender things  
I gotta know for sure what you really mean  
There's love that will never die  
There's love that will make you cry  
What kind of love are we talking about  
What kind of love are we talking about  
When you talk about forever  
Do you really mean tonight  
Or do those four little letters  
Mean we'll be together  
For the rest of our lives  
I hear everything you say  
But just so there's no mistake  
What kind of love are we talking about  
What kind of love are we talking about  
What kind of love are we talking about  
What kind of love are we talking about
