

# Honeymoon Suite, All Along You Knew

Night has fallen,  
In my little town  
It won't be long now,  
To see who's around

Hiding,  
Waiting  
In the darkness for me  
Waiting

I told her, she gotta  
Stay away from me  
Try to figure a way  
And let the two of us be

We can't be just lovers  
We can be friends  
Without her touch  
The loneliness would be too much

All along you knew about the two of us  
Breaking all the rules  
All along you knew  
That all I really needed was you

In the cover of darkness  
In the heat of the night  
The roll that we burn  
Outta the line of sight

Fighting, to leave  
But I can't pull away  
She phones me

I know, that you know  
What is going on  
And I guess your silence  
And you get my soul

I turn around  
But you turn away  
Without her touch  
The loneliness would be too much

All along you knew about the two of us  
Breaking all the rules  
All along you knew  
About us

All along you knew about the two of us  
Breaking all the rules  
All along you knew  
That all I really needed was you

Whoa, whoa

All along you knew about the two of us  
Breaking all the rules  
All along you knew  
About us

All along you knew about the two of us  
Breaking all the rules  
All along you knew

That all I really needed was you
