

Honeymoon Suite, Love Fever

Ah just this one time / let me in
Just this one time / let me take you down
I've been waiting for too long now
Let me show you how

We are too far gone to turn back now
I'm breaking down your door
To get to you somehow

You are the only one girl and I can't fight it
You give me love fever till I come undone
Everything I want, everything I need
You are the only one

Down the line, I've been waiting
Down the line, I need my share
Coming to get you out of the shadows
Let me take you there
Don't try and tell me I'm not the one
Breaking the laws of love
I won't stop till I'm done

You are the only one girl and I can't fight it
You give me love fever till I come undone
Everything I want, everything I need
You are the only one

(GUITAR SOLO)

You are the only one girl and I can't fight it
You give me love fever till I come undone
Everything I want, everything I need
You are you are you are the only one

You are the only one girl and I can't fight it
You give me love fever till I come undone
Everything I want, everything I need
The one the one the on, baby
