

Hot Rod Circuit, Failure

I feel like a failure
does anybody care
they say your a breakthrough
and you're on your way there

I have no feelings
is that what you think
this world has no meaning
and this ship's about to sink

And the way that you looked at me
I'm lucky I'm still alive
gonna fail you this time
gonna run away gonna fail you one last time

I feel like a captive
I'm under your spell
with eyes that could cut through
they can send you straight to hell

I feel like a failure
does anybody care
they say your a breakthrough
and you're on your way there
