

Hot Water Music, It's Hard To Know

(for Gary Lee)

we couldnt help but cry
when we were brought to life
drug out by the cold
slapped a few times to the rhythm of the flickering lights
with tightly closed sore eyes we grow
to either be or hate what's cold and
what's when we learn to know to run
don't follow and lead a life the best we know
it's hard to find your way through the darkness
and its hard to know what to believe
but if you live by your heart and value the love you find
when you have all you need to run don't follow lead a life
the best we know let's talk about an independent stand
let's talk about freeform thought
it's not about living under command
so don't get caught
live your heart and never follow
