

Hotel Lights, Follow Through

Starting over again
You've made your mind up
Let your hard luck end and make it new
Do it now, girl

If you're leaving then leave
If you need it then I want you to

Let your thoughts come in
Dedicated to you
Stories I've heard like a man on the moon
Lessons I've learned

If you're leaving then leave
If you need it then I want you to

There's no use thinking
Why these phases change you
You're not waiting here for anyone
I'll break down if you come around
When you need it I want you to

Take the past and cut it out
Let the knife turn to rust
Make something else up there's majesty in motion
You've made your mind up

If you're leaving then leave
If you need it then I want you to
If you want it I want you to
If you're leaving then leave
If you need it I want you to
