

Huckapoo, Run Away

You say
There's got to be a better way for me and you
And I say
I don't think about it now, cuz I know what to do

I could take you away
I could take you today
I know nothing can stop us now

[Chorus]
Run away with me
Let's get out of this place
We could take a ride and fly off into space
There's a big wide world that's waiting for you
If you want it, come on
Say we'll run away...run away

There's always
Gonna be someone who tries to pull you down
But they'll stay right here forever
They will never leave this town

Let's go disappear
Let's get out of here
You know nothing can stop us now

[Chorus]
Run away with me
Let's get out of this place
We could take a ride and fly off into space
There's a big wide world that's waiting for you
If you want it, come on
Say we'll run away...run away
Run away

[Bridge]
If you want it
you can have it
Don't let nothing or nobody hold you down

I could take you away
I could take you today
Better hurry or I'll be gone
So come on

Run away with me
Let's get out of this place
We could take a ride and fly off into space
There's a big wide world that's waiting for you
If you want it, come on
Say we'll run away (just say you'll run away)
Run away with me
Let's get out of this place
We could take a ride and fly off into space
There's a big wide world that's waiting for you
If you want it, come on
Say we'll run away...run away
Run away
Run away
