

Hugh X. Lewis, What I Need Most

I burned the toast again today my coffee was too strong
I didn't hear that clock alarm and so I slept too long
I packed myself the same old lunch the way I always do
I'm not for sure but got a hunch what I need most is you
Ever since you went away things keep going wrong
What I'm really trying to say come on back where you belong
Can't find a pair of socks that match my shirts are never clean
Yes I'm the worst dressed guy in town I'm wearing blue with green
Can't think to pay those bills on time they're always overdue
But these are little things I'd find what I need most is you

[piano]

Ever since you went away things keep going wrong
What I'm really trying to say come on back where you belong
You left and my world fell apart the nights I sleep are few
But nothing suffers like my heart what I need most is you
